The Physical Review journal collection of 14 leading peer-reviewed research journals includes Physical Review Letters, Physical Review X, Physical Review, and Reviews of Modern Physics. Physical Review journals. How to recognize peer-reviewed (refereed) journals. In many cases professors will require that students utilize articles from "peer-reviewed" journals. Sometimes the phrases "refereed journals" or "scholarly journals" are used to describe the same type of journals. But what are peer-reviewed (or refereed or scholarly) journal articles, and why do faculty require their use? Three categories of information resources

Examining the publication to see if it is peer-reviewed.
