This book has In his 1839 book about the natural history of sperm whales, Thomas Beale, a surgeon aboard a whaleship, described them as "a most timid and inoffensive animal readily endeavouring to escape from the slightest thing which bears an unusual appearance". But Dr Richard Bevan, a zoologist and lecturer at Newcastle University, suggests that a sperm whale may remember if it was previously attacked. "I have no doubt that an individual would remember being harpooned and might respond aggressively if it thought that it was threatened," he said.
