The Science of Superheroes Lois H. Gresh

The truth about superpowers . . . science fact or science fiction?

""An entertaining and informative guide to comic book wonders bound to come.""

—Julius Schwartz, Editor Emeritus, DC Comics

Superman, Batman, The X-Men, Flash, Spider Man . . . they protect us from evildoers, defend truth and justice, and, occasionally, save our planet from certain doom. Yet, how much do we understand about their powers?

In this engaging yet serious work, Lois Gresh and Robert Weinberg attempt to answer that question once and for all. From X-ray vision to psychokinesis, invisibility to lightspeed locomotion, they take a hard, scientific look at the powers possessed by all of our most revered superheroes, and a few of the lesser ones, in an attempt to sort fact from fantasy. In the process, they unearth some shocking truths that will unsettle, alarm, and even terrify all but the most fiendish of supervillains.

Lois Gresh (Rochester, NY) has written eight novels and nonfiction books as well as dozens of short stories and has been nominated for national fiction awards six times.

Robert Weinberg (Oak Forest, IL) is a multiple award-winning author of novels, nonfiction books, short stories and comics.

In preparation for the studyâ€”The Science of Superheroesâ€”we stocked the classroom with superhero books. Some were picture books, and some were junior graphic novels designed like comic books but with age-appropriate content. We hung a large piece of paper on one wall so the children could collaboratively draw and create the city they were protecting.Â With a more developed understanding of superheroes, the children gained a new vocabulary, and conversations were more complex. The teachers could guide childrenâ€™s superhero play, encourage teamwork, and suggest alternative story lines. Superheroes also became a common play theme for everyone, which led to different friend groups playing together with less friction.
