Radar for Meteorologists: Or You, Too, Can be a Radar Meteorologist, Part 3. Front Cover Rinehart Publications, 2010 - Radar meteorology - 482 pages.

National Weather Service meteorologists noticed something puzzling on their radar screens in Southern California on Tuesday evening — a big green blob. “It was very strange because it was a relatively clear day and we weren’t really expecting any rain or thunderstorms,” Casey Oswant, a NWS meteorologist in San Diego, tells NPR. “But on our radar, we were seeing something that indicated there was something out there.” So the meteorologists called a weather spotter in Wrightwood, Calif., near the blob’s location in San Bernardino County. Oswant says the spotter told them the mysterious cloud was actually a giant swarm of ladybugs.
