The computational complexity of H.264/AVC is known to significantly higher than to those of the previous standards, and quite a number of researches have been carried out to accelerate the H.264/AVC encoding or decoding using algorithm improvement, SW optimization, and HW acceleration both at the system level and at particular functional blocks. Statistical DNA Forensics sets out to provide a practical guide to the analysis of DNA evidence. The authors present an overview of the essential statistical methodology and computational techniques used in analyzing DNA evidence. Basic genetics and elementary statistics are introduced, enabling readers from either discipline to understand complex forensic cases and make use of the advanced topics presented.
