The Stock Market Work? 3 Dec 2017 . Understanding how the stock market works is not a complicated or lofty task. I can teach you the basics in this one article!

The stock market is a system comprised of stocks (or equities) which are ownership stakes in companies. Stocks price rises when the lowest price a market participant is willing to sell at rises, and is vice versa for a stock falling in value. Stocks are tied to business cycles. Markets with high esteem are bull markets, where people will buy stocks they see no intrinsic value, but buy just because the market is swinging up, and bear market which is the other side of coin. This is very important in the pricing of equities. Stocks are issued on IPO (more)Loading– Originally Answered: How does The stock market itself is composed of individual companies offering public shares of their business. The New York Stock Exchange currently hosts 2,800 companies and trades more than 1.46 billion shares each day. How The Stock Market Is Regulated. The United States uses two government agencies to oversee activity in the stock market.Â They work to protect investors against abusive trade practices, fraud, and market manipulation. How Stocks Work. When you purchase â–estock– in a company, that means you–re buying a slice of ownership in that business. Companies use stocks to raise money for expansion, create products, and fund other business expenses. When a company first appears in the stock market, they–ll offer shares to their company via an initial public offering (IPO). Overview of How the Stock Market works. Stock Market works on the basic principle of matching supply and demand through an auction process where investors are willing to pay a certain amount for an asset (stock, in this case) and they are willing to sell off something they have at a certain price. Therefore, each asset has a value â– which is the individual–s preference and price â– which is the market–s determination of the asset–s value. This means that the stock market works on the principle that one person–s selling price might be another person–s buying price and it tries to match it.
