Textbooks of Physiology. (and other potentially useful books). These textbooks can be purchased on-line from Amazon.com (by pressing the "get it at amazon.com" button - that's also where you'll find more info on the book and its price). Press this button to buy (or just to get more info). Arthur C. Guyton, John E. Hall. Textbook of Medical Physiology. Hardcover - 1064 pages, 10th edition (August 2000) Mosby; ISBN: 072168677X ~ \$65 (~ 2400 - 3000 KÅ). Outstanding textbook. The author (ACG), whose primary research contributed significantly to elucidation of several key mechanisms of cardiovascular homeostasis, is an excellent teacher capable of presenting even the most complex topics in an understandable and fun way. Book Description: Human Anatomy and Physiology is designed for the two-semester anatomy and physiology course taken by life science and allied health students. The textbook follows the scope and sequence of most Human Anatomy and Physiology courses, and its coverage and organization were informed by hundreds of instructors who teach the course.
