The main goals of the CompEdCenter are to bring together all of the Scholarship of Teaching and Learning (SoTL) efforts, innovative course management tools, and the many years of experience of the UVA computing faculty to enhance our impact at UVA, in Virginia, and around the world. The University of North Texas (UNT) is a public research university in Denton, Texas. Eleven colleges, two schools, an early admissions math and science academy for exceptional high-school-age students from across the state, and a library system comprise the university core. Its research is driven by about 38 doctoral degree programs. North Texas was founded as a nonsectarian, coeducational, private teachers college in 1890 and was formally adopted by the state 11 years later. UNT is the flagship This university is home to Turing Award winners, members of the National Academies of Engineering and of Sciences, Computers and Thought Award winners, Simons Investigators, and myriad faculty. Our faculty are at the heart of what has made the University of Texas at Austin one of the most successful institutions in the world at advancing the field of computer science. This university is home to Turing Award winners, members of the National Academies of Engineering and of Sciences, Computers and Thought Award winners, Simons Investigators, and myriad faculty redefining the frontiers of computer science research and education.
