McKinsey Global Institute Urban world: Cities and the rise of the consuming class. Executive summary. A wave of urbanization propelling growth across emerging economies is a welcome fillip for a world economy that continues to have pockets of acute fragility. Cities have been the world's economic dynamos for centuries, attracting skilled workers and productive businesses and benefiting from economies of scale. But what is different about today's wave of mass urbanization is its unprecedented speed and scale. It is not hyperbole to say that we are observing the most significant shift in the earth's economic center of gravity in history. The move to urban living is lifting the incomes of millions of people around the world. Built as a City book. Read reviews from world's largest community for readers. We'd love your help.
