Knowledge and Skills Development to ensure Project appraisal using discounted cash flow. 1.11 In addition to using DCF analysis to help an organization improve decision-making, professional accountants in business could encourage a wider assessment of the strategic impact and economic rationale of a potential investment. Organizations should place investment appraisal in a wider strategic context. For example, determining whether acquisition or internal growth is most effective in reaching an organization's strategic objectives requires an understanding of the business environment and an organization's specific situation. In some situations, it could encourage bias in projections and skew investments towards higher risk projects. PRINCIPLE D.
