Regulation of trade is necessary in order to ensure that the harvest of specimens does not reduce the wild population to a level at which its survival might be threatened by continued harvest or other influences. It therefore qualifies for inclusion in Appendix II by satisfying criterion B in Annex 2a of Resolution Conf.Â Herpetology of Africa: a checklist and bibliography of the orders Amphisbaenia, Sauria, and Serpentes. Krieger Pub. Co., Malabar, Florida. Recent papers in African herpetology. Papers. People. A review of the genus Homopholis Boulenger (Reptilia: Squamata: Gekkonidae) in southern Africa. ABSTRACT On the basis of molecular data, the gekkonid lizard Homopholis arnoldi Loveridge is revived as a full species. Morphologically it is usually distinguishable from H. wahlbergii on the basis of its striped dorsal colour pattern. more.Â A key is provided for the four currently recognised species of Homopholis and a neotype from KwaZulu-Natal is designated for H. wahlbergii, helping to stabilise the use of this name in light of the resurrection of H. arnoldi. Save to Library. by Todd Jackman. In C. mclach/ani the posteriormost scale of the supraocular - supraciliary scale group is in good contact with the corresponding anterior parietal (Figure 2), underscoring the decision that this scale should be considered a supraocular rather than a supraciliary. Although one will have to consider the posteriormost scale as a supraocular, it appears to be quite clear that this scale normally represents a fusion of the fourth supraocular and the third supraciliary.Â Herpetology of Africa: A checklist and bibliography of the orders Amphisbaenia, Sauria and Serpentes. Robert E. Krieger Publishing Company, Malabar, Florida. WERMUTH, H. 1968.
