I went through it more than 10 years ago, and luckily it worked out well for me—but it wasn't easy. Here are a few things I learned along the way that may help you decide whether to pull the trigger and change careers at midlife, or to stick with what you've got. If you can change careers and start doing new work that you love, while still making the same or higher salary, well, you probably don't need to read this article. Usually, however, a career change involves taking a pay cut and losing benefits. Can you afford that? Do you want to deal with the stress of holding to a tight budget for an unknown period of time? As you get older, health insurance gets to be a bigger worry than salary.
