In the past decade there has been rapid growth of the internationalization of higher education, and this provides an opportunity to explore environmental issues that have both local relevance and global importance for the next generation of decision makers. New York University has established itself as a 'global network university' with 3 major portal campuses and 11 academic sites spanning 13 nations on five continents. The paper surveys the patterns of information-seeking behavior of academic staff in Nigeria in the emerging electronic information environment. Academic staff in Rivers State University of Science and Technology (RSUST), Port Harcourt, Nigeria were used as respondents in the survey. Questionnaire survey was used as research method for data collection. Information-Seeking Behaviour of Graduate Students in Nigerian Universities.
