Authoritarian rulers both stimulate and respond to an international political environment in which conflicts of prestige, interest, and pure fear of what other states might do all lead states toward war. In order to organize a group of rational beings, who together require universal laws for their survival, but of whom each separate individual is secretly inclined to exempt himself from them, the constitution must be so designed so that, although the citizens are opposed to one another in their private attitudes, these opposing views may inhibit one another in such a way that the public conduct of the citizens will be. The past five years have witnessed a resurgence of regionalism in world politics and an increasingly important role for regional institutions. This book provides a timely and authoritative analysis of recent trends towards the new regionalism and regionalization, assessing their origins, present and future prospects and place in the evolving international order. Excerpt. Some regard it as a positive and permanent characteristic of the post-Cold War international order. Others are more sceptical and believe, that like the regionalism which flourished in the 1960s, this newer version will have a limited application and shelf life. However, both regional optimists and pessimists must agree that whatever its content, regionalism is on the increase.
