New Ed edition. by Leonard E. Foote, Samuel B. Jones Jr. Can you add one? First Sentence. The ability to identify shrubs and vines is dependent upon recognizing differences in features between one species and another. The Physical Object.
This publication focuses on native trees, shrubs and woody vines for Georgia. It is not our intent to describe all native species â€“ just those available in the nursery trade and those that the authors feel have potential for nursery production and landscape use. Rare or endangered species are not described. Information on each plant is provided according to the following categories: Common Name(s)/Botanical Name/Family, Characteristics, Landscape Uses, Size, Zones and Habitat. Many of the images are copyrighted and have been used with special permission from the photographers and/or the organizations providing them. Any use of these images beyond this publication is discouraged and will require permission from the photographers. Guy Anglin. Chuck Barger.
