Courses in listening and speaking skills have a prominent place in language programs around the world today. Ever-growing needs for fluency in English around the world because of the role of English as the worldâ€™s international language have given priority to finding more effective ways to teach English. It is therefore timely to review what our current assumptions and practices are concerning the teaching of these crucial language skills.Â This booklet explores approaches to the teaching of listening and speaking in light of the kinds of issues discussed in the preceding paragraphs. My goal is to examine what applied linguistics research and theory says about the nature of listening and speaking skills, and then to explore what the implications are for classroom teaching.

a balanced literacy approach. supporting student success in reading, writing, listening and speaking. This document is designed as a reference tool for K-9 educators. Balanced literacy is an instructional approach for Language Arts. This means that teachers must explicitly teach and model comprehension strategies that students can use as a "toolbox." 3. Each day, students have structured talk about their reading. Talking is thinking and is the foundation of literacy. Talking is thinking and is the foundation of literacy. 4. Each day, students listen to an adult fluently read aloud in order to hear what effective reading sounds like and to develop an appreciation of reading. 5. Each day, students write something meaningful. The purpose of language learning is to improve the speakers' four skills of listening, speaking, reading and writing, with the base of large vocabulary and good grammar, but this is not the final purpose. The final purpose is to let speakers be able to... In addition, teaching the learners a lot of listening activities is a good way of enlarging their vocabulary. On the other hand, it also helps the learners improve their listening comprehension. For instance, people know that the largest difference between mother language learning and foreign language learning is the environment. For a foreign language, we can meet it only in formal places and classes. Training and practicing the oral reading is not a day's work. Practice is important. Described by reviewers as one of the most comprehensive and complete texts to be published in the field in years, Teaching the Language Arts provides readers with a truly balanced approach to the teaching of language arts with an emphasis on the arts themselves. Written with the belief that all children and teachers possess creative potential, the author masterfully integrates essential elements of phonics instruction with critical principles of literature-based instruction, namely literature, comprehension, writing, and oral language. Cramer's engaging writing style leaves readers feelin

"Phonics" emphasizes the alphabetic principle the idea that letters represent the sounds of speech, and that there are systematic and predictable relationships between written letters and spoken words, which is specific to the alphabetic writing system Children learn letter sounds (b = the first sound in "bat" and "ball") first and then blend them (bl = the first two sounds in "blue") to form words. Children also learn how to segment and chunk letter sounds together in order to blend them to form Listening as a skill takes priority over details of language content. Along... Along this shift different approaches were chosen to teach listening. In late 1960s and in the early 1970s comprehension approach was used. It was a teacher centered approach in which no attention was given to mistakes or what may cause these mistakes. Teachers focused upon the outcome of listening rather than upon listening itself, upon product rather than process. Learners kept experiencing the same difficulties in same listening exercises as they were not taught how to deal with them. Comprehension approach provided practice in listening but failed to practice it.

It is taught by using an inquiry approach to discover patterns and make generalizations as to how words work. Therefore, teachers choose words and patterns that approach the zone of proximal development of the studentsâ€™ individually. In word study, not all students are working on the same words or patterns because they all have different ZPDâ€™s. How great is that?â€” The children participated in a wide range of meaningful reading and writing activities during the language arts block, including a systematic spelling program based on words they had misspelled in their own writingâ€” (Brand, 2004). Word study in an integrated language arts program that uses the words actually read and written by students. Second Language Listening - by John Flowerdew February 2005.â€” Richards (ibid.) maintains that instructional materials can have a profound effect on teaching and that teachers rely on such materials to define the language courses they teach. He quotes one teacher who talked about some new materials she tried out: â€œThis book has totally turned around the listening program in our school. We really didn't know what to do with listening beforeâ€” (p. 6). The approaches we discuss here are the grammar-translation approach, the direct-method approach, the grammar approach, the audio-lingual approach, the discrete-item approach, the communicative approach, th The language arts: A balanced approach to teaching reading, writing, listening, talking, and thinking.
