Knowledge and Skills Development to ensure Project appraisal using discounted cash flow. 1.11 In addition to using DCF analysis to help an organization improve decision-making, professional accountants in business could encourage a wider assessment of the strategic impact and economic rationale of a potential investment. Organizations should place investment appraisal in a wider strategic context. For example, determining whether acquisition or internal growth is most effective in reaching an organization's strategic objectives requires an understanding of the business environment and an organization's specific situation. In some situations, it could encourage bias in projections and skew investments towards higher risk projects. PRINCIPLE D.

In this Oxford Project Appraisal and Risk Management (PARM) program, you will acquire knowledge & tools to conduct project appraisal. If an important capital project does not achieve the financial and strategic goals of the promoter organisation, it can result in financial losses, waste of resources and impacts across wider reputational spheres. If that failure stems from not applying the tools and techniques of modern project appraisal, risk analysis or project selection, these are avoidable errors. The decision whether or not to invest a substantial amount in a new capital project can be
