Research problems and questions and how they relate to debates in Research Methods.Â As students of "Research Methods", we must know the difference. What is it? Textbooks treat this differently but research "methods" usually refers to specific activities designed to generate data (e.g. questionnaires, interviews, focus groups, observation) and research "methodology" is more about your attitude to and your understanding of research and the strategy you choose to answer research questions. Welcome to the course "Research Methods for Business Students". Robert Barcik will provide you with some handy advice of how to proceed with the course materials in this introductory lecture. Introductory Lecture.Â Students often forget that their research should be addressing some particular problem that is occurring outside in the world. If the research is not addressing any problem, then it's us who will have a problem :) Anyway, there needs to be a dedicated part in our research where we identify and justify every aspect of the problem that we are trying to solve.
