Swain, N - Article Catalogues

Most of Central and Eastern Europe countries experienced large GDP declines in the 1990 s which was resulted from large extent from an overall decline in competitiveness and increasing technology gap in comparison to western countries. 1 Specifics of Technology Transfer and the Innovation Process Technology transfer is a key factor strongly impacting on economic growth both in the short and long term. The scale of diffusion of the transferred technology depends to a large extent on existing In technology gap theory foreign trade is possible thanks to differences in economic development across countries; in production scale theory the gain and competitive share is possible due to high specialisation and decrease of costs per produced unit.
