The Developmental State.Â Evans's years of comparative research on the successes and failures of state involvement in the process of industrialization have here been crafted into a persuasive and entertaining work, which demonstrates that successful state action requires an understanding of its own limits, a realistic relationship to the global economy, and the combination of coherent internal organization and close links to society that Evans.

In this paper, we try to address these shortcomings and systematically compare the respective merits of economic, cultural and political theories of separatism, using 338 sub-national groups from around the world and data from numerous sources. Our dependent variables are separatist activism broadly conceived and separatist violence, which we observe to respond to somewhat different logics. In contrast to the currently popular economic models of civil wars, we find that political factors dwarf other approaches. Specifically, groups in failed and transitioning states, those who control or have
