Philosophy of econometrics is concerned with the systematic study and appraisal of general principles, statistical procedures and modeling strategies, as well as philosophical presuppositions that underlie econometric methods, with a view to evaluate their effectiveness in achieving the primary objective of "learning from data"™ about economic phenomena of interest. In philosophical jargon it is a core area of the philosophy of economics, concerned primarily with epistemological and metaphysical issues pertaining to the empirical foundations of economics. In particular, it pertains to methodolo
