Care at Mayo Clinic. For the diagnosis of insomnia, the diagnostic categories "Non-organic insomnia" (F51.0) and "Disorders of initiating and maintaining sleep (insomnias)" (G47.0) are relevant. The definition for non-organic insomnia is presented in Table 1.Â Table 2 shows the diagnostic criteria for insomnia according to the ICSD-3. In order to receive the diagnosis, there must be a disturbance of nocturnal sleep (criterion A) and related daytime impairment (criterion B). Furthermore, the sleep disorder has to occur at least 3 nights a week for a period of 3 months to be diagnosed as a clinically relevant disorder. If diagnostic criteria are fulfilled co-morbid with a mental or somatic disorder, both disorders are diagnosed.
