I have been here in Cambodia since the UNTAC years and saw for myself the bloated and clueless mafias of aid agencies. They come barreling through town with their wide tires, shiny 4wds and millions upon millions of dollars of funding. They were throwing money around like it was confetti. I saw it for myself and heard it first hand from their people and have come to see international aid as the world's good intention gone wild. In this book Shawcross elaborates on what many of us poor casual observers suspected right away then: aid agencies solve problems as they perceive it at first sight *The Quality of Mercy: Cambodia, Holocaust, and Modern Conscience*. *The Shah's Last Ride: The Fate of an Ally*. *Murdoch: The Making of a Media Empire*. Eichmann himself maintained after his arrest that he was merely following orders and that he had abdicated his conscience in order to follow the Führerprinzip. But that was not true. In 2011, the German news magazine, *Der Spiegel* published an investigation of Eichmann based on what it said were "formerly confidential, secret and top-secret documents." He singles out former U.S. Ambassador to Thailand Morton Abramowitz and his wife, as well as former Assistant Secretary of State Richard Holbrooke and several other U.S. government officials, for their determination to prevent a new holocaust. In the end, this compelling book demonstrates how officials who really care about humanitarian goals can and do get around lethargic bureaucracies. Enjoy more high-quality articles like this one.
