Our route was to follow the Yellowstone to Yukon (Y2Y) ecological corridor, winding south along the continent's spine, the Rocky Mountains. There, at the beginning, our entire journey lay out before us waiting to show us its wonders if we only let them come. The first leg of our Ride for the Wild brought us through northern taiga, and our first reprieve from the rigors of the road, Liard Hot Springs. Here we meet Richard, a First Nations man who led us to the hottest part of the spring to share stories.
