American Science in the Age of Jefferson by John C. Greene

Science and technology in the United States has a long history, producing many important figures and developments in the field. The United States of America came into being around the Age of Enlightenment (1685 to 1815), an era in Western philosophy in which writers and thinkers, rejecting the perceived superstitions of the past, instead chose to emphasize the intellectual, scientific and cultural life, centered upon the 18th century, in which reason was advocated as the primary source for legitimacy. Man of Learning, Culture and Science. Thomas Jefferson: An American Man for All Seasons - A Selected List of References. The Eye of Th. Jefferson [exhibition]. Edited by William Howard Adams.
