The kids were fine - their classroom instruction was toxic. I went back to university, got my teaching credential and masters of education and for the past being used outside the confines of medical and psychological study,

Thanks to educational psychology, students can "learn how to learn," developing more patience with themselves and others as they grasp new material. If a teacher comes to the classroom with the basic knowledge that students learn differently, they will be better equipped to arrange the lessons in such a way that all senses are activated. Enhance your own learning with a Certificate III in Education Support.

2. Reinforce. Take geography as an example. According to educational psychology, if a teacher is instructing a class of kids about the fifty states and capitals in the United States, it should be reinforced three different ways. For the visual learner, use maps and worksheets. For the auditory learner, create a song that helps them remember.

Educational Psychology: Classroom Connections pdf download Educational Psychology: Classroom Connections ipad Media Literacy Clearinghouse is to assist K-12 educators to locate appropriate media resources for teaching, integrate them into classroom instruction, and help students read/judge media ; it's a huge collection. The Media Spot integrates media literacy education through digital media production in schools, classrooms, afterschool programs, and other educational settings

2. Reinforce. Take geography as an example. According to educational psychology, if a teacher is instructing a class of kids about the fifty states and capitals in the United States, it should be reinforced three different ways. How Educational Psychology helps a Teacher at University? Why Should Teachers Study Educational Psychology? A teacher can create a good and soft environment in a classroom so that it will be even easier for the students to learn. Also, the teacher can create a sense of discipline, group work, and kindness towards each other. With the help of educational psychology, a teacher can involve them in activities regarding their subject so that they will learn effectively.
