We wrote a book on Mathematics for Machine Learning that motivates people to learn mathematical concepts. The book is not intended to cover advanced machine learning techniques because there are already plenty of books doing this. Instead, we aim to provide the necessary mathematical skills to read those other books. The book will be published by Cambridge University Press in early 2020. We split the book into two parts: Mathematical foundations. Example machine learning algorithms that use the mathematical foundations. We aim to keep this book fairly short, so we don't cover everything. We will start by marking it as "Reading And Writing To Learn Mathematics: A Guide And A Resource Book" as "Want to Read: Want to Read saving time". a must read for math teachers. It is about how mathematics should be taught. When you start reading, you will realize that, the book is a
powerful criticism on the prevalent curriculum of Mathematics in elementary, middle and high schools. <https://amzn.to/2zDEauN>. Paul
Lockhart thinks that, mathematics is an art, and it is much more than memorization of notations and formulas. For him, mathematics is a
life-long love. He believes that, we have to stop teaching mathematics in the traditional way and we need to start using our natural
curiosity to teach and learn mathematics. It is
