

Books for Families: Dealing with Loss, Healing with Love

Children’s literature abounds with stories of loss and recovery. Often a theme of struggle or separation allows family members to relate a plot to their own challenges. While there are many books available today about issues of loss, illness, death and grief, there is no one perfect book to suggest. Guidelines and lists follow. Most titles are available at local libraries and bookstores. Others are available through the internet.

Guidelines for adults:

Do review the book first before sharing it with a child.

Remember that the specific relationship involving a death does not need to be the same as the family’s loss. Stories about animals may provide a more comfortable exploration of feelings for younger children.

Browse for books to reflect your own cultural or family values. Many books have religious themes. Use books about other cultures to increase awareness and sensitivity.

Choose books which younger children can understand. Often older siblings, teens, and adults will enjoy these stories, too.

Read the books together. Reveal your own feelings about the characters and story.

Upon finishing a book, explore together alternative options. Ask, “What would you have done?” Use the book as a tool for family discussion of a difficult topic.

Leave books around the home so that children may return to them in their own time and at their own pace.

Re-read favorites.
